Projects

Color Generator ([Link](#))

- Developed a random RGB color and displays it when the "Generate Color" button is clicked. You can further enhance it by adding features like copying the generated color code, generating specific color formats (hex, HSL, etc.), or incorporating color schemes.
- Used HTML, CSS, Javascript.

SharePizza ([Link](#))

- Building a responsive pizza shop application using React and Bootstrap involves setting up a React project, integrating Bootstrap for responsive design, creating various components for different pages. This project only for design.
- Used React-Bootstrap and React Js.

Search-Images ([Link](#))

- Building an image search application using the Unsplash API involves setting up a React Project, integrating Axios for API requests, creating components to handle search input and showing images...
- Used React Js.

Skills :

- HTML
- CSS
- Bootstrap
- JavaScript
- React Js
